DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Barrow US 5,706,178.

Barrow discloses a connection component including a dielectric element (14), conductive pads (20) on the first surface, conductive vias (30) electrically connected to the pads and extending to the second surface, wherein the at least one of the via openings is offset from the center of the pad (see fig. 6 and related text). Also, the via may have a closed end (see fig. 4), there may be a fusible mass (36) attached to the first surface, the dielectric element could be flexible (col.2, lines 55-57), and the conductive vias can be any known conductive material in the art.
